

IGLOO MAXCOLD 165 QT MARINE COOLER

Quick-Use Guide | Costco item #2622042 | Non-electric hard-sided cooler

PRODUCT BASICS

- Capacity: 165 quarts (approx. 156 L); up to 280 beverage cans.
- Features: Insulated body and lid; butterfly quick-access hatch; two removable party-bar dividers; stay-open lid hinges; swing-up carrying handles; fish ruler on lid; tethered, garden-hose-threaded drain plug.
- Cold performance: Advertised ice retention up to 7 days at 90°F under test conditions. Actual results vary with use and conditions.

BEFORE FIRST USE

- Inspect the body, lid, hinges, latches, hatch and drain plug for damage. Check that the drain plug is securely installed.
- Wash the food-storage surfaces with mild detergent and water. Rinse thoroughly and dry.

USING THE COOLER

- Place cooler on a stable, level surface. For best results, pre-chill foods, beverages and the cooler; add sufficient ice or ice packs.
- Use the two dividers to separate contents as needed. Open the small butterfly hatch for quick access instead of opening the entire lid.
- Close the hatch and main lid fully after each use. Use the carrying handles when moving; get help lifting a heavily loaded cooler.
- Keep perishable foods at 40°F (4°C) or below; use a food thermometer to verify safe temperature.

DRAINING, CLEANING & STORAGE

- Position the drain outlet where water may safely flow. Unscrew the tethered drain plug to release meltwater; the threaded outlet can accommodate a compatible garden hose. Reinstall plug securely afterward.
- Empty after use. Wash with water and mild detergent; for stubborn spots, try a diluted baking soda solution. Rinse away cleaners completely and dry before storage.
- Store clean, dry and out of prolonged direct sunlight. Do not use abrasive cleaners or sharp implements on the liner.

SAFETY & TROUBLESHOOTING

- Not cooling well? Add ice, reduce lid opening, move to shade and check that the lid and hatch close properly.
- Water leaking? Check drain plug position and threads, and inspect the liner and body for cracks.
- Safety: Never allow children to climb inside or play in the cooler; risk of entrapment or suffocation. Do not use dry ice in a tightly sealed cooler.
