

IGLOO MAXCOLD ISLAND BREEZE

62-Quart Rolling Cooler | Quick-Use Guide | UPC 034223341152

PRODUCT AT A GLANCE

- 62 US qt (approximately 58 L) insulated, non-electric cooler for ice, beverages and chilled food.
- Ultratherm insulated body/lid; rolling wheels, wide-grip locking telescoping handle, and side carry handles.
- Keeps contents cold using added ice or ice packs; it does not actively refrigerate.

FIRST USE & PACKING

- Before first use, wash the interior and food-contact surfaces with mild dish soap and warm water. Rinse and dry.
- Pre-chill the cooler and the food/drinks. Add plenty of ice or frozen ice packs, then load chilled items.
- Close the lid completely. Keep the cooler in the shade and open it only when needed.

MOVING & USING THE COOLER

- Extend the telescoping handle until it locks, tilt the cooler onto its wheels, and roll it over suitable ground.
- Retract the handle for storage. Use the molded side handles when lifting; get help with heavy loads.
- Keep perishable food at 40°F (4°C) or colder; check with a food thermometer as needed.

CLEANING, SAFETY & STORAGE

- After use, remove remaining ice/water, wash with mild soapy water, rinse, and air-dry completely.
- If your unit has a drain plug, close it securely before travel; open it only when draining.
- Do not allow children or pets to climb inside. Never store dry ice in a sealed cooler; avoid harsh abrasive cleaners.
- Store dry with the lid slightly open to help prevent odors. Do not use the cooler as a seat or step.

QUICK TROUBLESHOOTING

- **Ice melts quickly:** Pre-chill contents, add more ice, reduce openings, and move out of sunlight.
- **Wheels/handle hard to use:** Clear dirt from wheels; verify the telescoping handle fully releases/locks.
- **Odors or moisture:** Wash, rinse and dry thoroughly before storing.
