

IGLOO MAXCOLD XL | 150-QUART COOLER

Quick-use guide | Model 50905 | Costco item 1872195 | Non-electric hard-sided cooler

CAPACITY	COOLING DESIGN	KEY FEATURES
150 US qt (142 L) Up to 256 cans	Insulated body and lid Up to 7 days ice retention*	Butterfly quick-access lid hatches Rubberized Sure-Lock latches

BEFORE FIRST USE

- Remove packing materials. Wash the interior, lid and accessible hatches with water and mild detergent; rinse and dry.
- Check that the drain plug is installed and tightened, the lid closes properly and the latches engage.

PACKING & EVERYDAY USE

- For best cooling, pre-chill food and drinks; add generous ice or frozen packs and keep the cooler out of direct heat where practical.
- Lift the main lid to load larger items. Close the lid and secure the rubberized latches for transport.
- Use the butterfly quick-access hatches for small items to reduce the need to open the full lid.
- Use the swing-up side handles when moving the cooler. A fully loaded cooler may require two people to lift.
- To drain melted ice, position the cooler near a suitable drain, carefully unscrew the drain plug and allow water to empty. Reinstall and tighten the plug before reuse.

SAFETY & CARE

- Keep the lid closed around children; never allow anyone to climb inside. The cooler is not a flotation device.
- Keep perishable food at safe chilled temperatures; use a food thermometer as needed. Ice-retention claims do not guarantee food-safe temperatures.
- Empty after use. Wipe clean with mild detergent or a diluted baking-soda solution; rinse thoroughly and dry before storage.
- Store clean and dry with the lid and drain opening slightly open to allow ventilation. Avoid prolonged unnecessary sun exposure.

QUICK TROUBLESHOOTING

- **Ice melting quickly:** Pre-chill contents, use more ice, limit lid openings and keep cooler shaded.
- **Water leaking:** Check the drain plug is properly seated and tightened; inspect for damage.
- **Odor:** Empty, wash, rinse thoroughly and allow the interior to dry completely.
